| 200 | <i>Viola pedata</i> —1 yr. trans. | 10.00 |

Below we list the finest lot of collected stock we have ever offered to the wholesale trade. They all lift with good balls, hence are available only within the Japanese quarantined area. A fine shaped, healthy lot.

AZALEA VIScosa

Our Azaleas are collected from the best native stock available in this section. They range from 12 to 48 inches and will lift with a ball of earth. A limited stock of specimen plants can be furnished upon request.

CLETHRA ALNIFOLIA

This is too well known to require description. The stock we offer is well formed and carries ball of earth.

ILEX GLABRA

We dig all our Ilex in the open where they have an excellent chance to grow into well shaped plants 12 to 24 inches high.

KALMIA ANGUSTIFOLIA

This variety should be better known. The bright pink flowers and narrow foliage are very attractive. Fine shaped specimens with ball.

KALMIA LATIFOLIA

Fine shaped plants with good ball.

LEIOPHYLLUM BUXIFOLIUM (DENDRIUM)

The small evergreen foliage is attractive the entire year. Early in spring it is completely covered with pure white flowers. Lifts with ball.

MAGNOLIA GLAUCA

Is taken from the swamps and burlaped as they are dug. We can furnish them with one stem or with three to six stems. 3 1/2 to 10 feet tall.

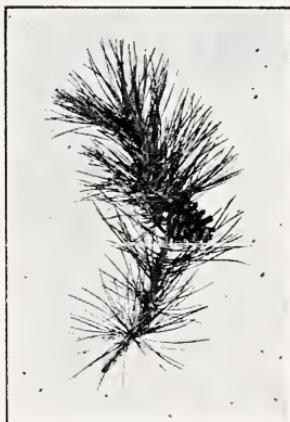

VACCINIUM CORYMBOSUM

Being well adapted to the soil of this section gives us collected stock AS GOOD AS NURSERY GROWN. We offer them to you at the price of collected stock.

VIBURNUM CASSINOIDES

These are extra fine shaped specimens with ball. Every plant is a specimen.

Let us know your requirements and we will quote on the sizes and quantities. We can handle a wide range of sizes. We can deliver within reasonable distance at moderate price.

PINUS ECHINATA
